

What six months of transactions tell the category manager

Where revenue is moving, which products carry each category, how discounting behaves, and when demand actually peaks — read across 107,836 transactions.

107,836	25	5	₹4,263.92	2.58
Transactions logged	Products tracked	Categories	Avg. revenue / transaction	Avg. units / transaction

§01 Category performance

Change in total monthly revenue, January to June. Two categories move in opposite directions at real speed; everything else holds roughly still.

Personal Care is the steadiest category start to finish (about ±2.2%). Electronics is the only category still falling in June, with no sign of levelling off.

§02 Top and bottom products, by category

Six-month revenue leaders and laggards within each category — the first place to look before the supplier conversation gets specific.

Category	Strongest	Second	Second-weakest	Weakest
Apparel	Saree ₹14.16M	T-Shirt ₹14.10M	Formal Shirt ₹13.75M	Kurta ₹13.61M
Electronics	Headphones ₹47.70M	Laptop ₹46.55M	Tablet ₹44.74M	Smart TV ₹41.88M
Grocery	Rice (5kg) ₹8.56M	Dal (1kg) ₹8.49M	Oil (1L) ₹8.43M	Sugar (1kg) ₹8.38M
Home & Kitchen	Mixer Grinder ₹16.90M	Storage Box ₹16.68M	Pressure Cooker ₹16.14M	Water Bottle ₹15.83M
Personal Care	Shampoo ₹8.17M	Body Lotion ₹8.11M	Toothpaste ₹7.77M	Sunscreen ₹7.59M

§03 Discount response

Avg. revenue per transaction (₹), by discount bracket.

Average units stay flat near 2.6 across every bracket — deeper discounts do not buy bigger baskets. No 25%+ transactions exist in this data.

§04 Sales timing

Avg. revenue per transaction (₹), by day of week.

Saturday leads at ₹4,420.02, Tuesday trails at ₹4,017.71 — a 10% spread. January was the strongest month chain-wide (₹84.77M) and June the weakest (₹69.28M), the same window Electronics fell hardest in.

§05 Five things to take into the review

Monitor	Electronics fell 35.02% , ₹45.69M to ₹29.69M, with no sign of levelling off. Challenge this category first.
Positive signal	Apparel grew 34.10% , ₹10.05M to ₹13.48M, sustained across all six months rather than one strong month.
Product review	Smart TV is the lowest-revenue product inside Electronics (₹41.88M). Read it against the category-wide decline before treating it as a standalone problem.
Discount finding	Revenue per transaction slides from ₹4,685.65 at 0% to ₹3,631.73 at 20% while units hold near 2.6.
Data required	Request product cost and gross margin before any profitability or investment call is made off these numbers.

Revenue and units draw a clear line between Apparel’s rise and Electronics’ decline — but they stop short of profitability.
